WASSIINGTON, Aug. 28.-This was he Mexican situation in brief to-day: President Huerta has withdraws his request for an exchange of Ambassadors and asked that the present diplomatic status continue until after the Mexican elections in October. By some that was sterpreted age concession. A request for recognition as the "con-

estutional government ad interim" which was coupled with the proposal for an exchange of ambassadors was, sowever, interpreted by many officials a practical reiteration of the original stand of the Huerta government.

Senor Gambes, Minister of Foreign Affairs, pointed out that the demand of the United States for the elimination of Huerta would be met by a provision of the Mexican Constitution which makes a Provisional President ineligible to reelection. WAY TO PROPOSALS Woman's Inspiration Causes the Man To Achieve His Best and Noblest Work

"Man Always Does His Best When He Is Favored With the Influence of a Good, Intelligent Female Companion," Declares "Harry B. K."

By Nixola Greeley-Smith.

Woman as the inspiration of man's greatness supplies the theme of a communication from an Evening World reader who declares to-day that WILSON REGARDS SITUATION while woman's mental capability is less than man's, she is in no sense

inferior to him. "The love of doing better things, the zest of achievement, the creative genius, the sense of responsibility toward mankind - all these things are the result of woman's inspiration," he says.

This gallant reader offers also a good word for that myth of the ages-woman's intuition. I believe the average masculine human being would rather part with his last tooth than with the belief that women are devoid of reasoning powers, yet possess a subtle sense of divination almost equal to that of a Scotland Yard detective or a Central Office man. Woman has no logic, they as sure us. She is a sort of intellectual chamois, leaping from crag to crag

understanding and sympathetic, all that is faithfulness and comradeship. And how could a man venture without those abstract yet necessary thmgs for his success?

to rise do as great and greate things than men. We all know that it is better to prevent than to cure. Woman prevents, and therefore she is awakening man to a better manhood. HARRY B. K. WOMEN TO BE GENIUSES MUST

BE SPINSTERS. Dear Madam: Eliminating all extraneous matter, the argument for the woman's side in the present discussion is that man's superior in tellect is entirely due to the fact that he is not hurdened with the cares of bables and the home, and that exceptional feminine intellect is always derived from the father. Assuming that these two propositions are true, it follows:

1. Since the majority of women will always prefer to be mothers, the exceptional woman must remain a celibate or her talent cannot op

2. The husbands must always be intellectually superior to their wives to produce a preponderance of feminine intellect. 3. The more foolish the wife is the better for the cause of woman, for the sons will then be as foolish as

the mothers, and the women wil soon be a race of geniuses, and then the inventive and creative work will be done by women exclusively, pro-vided that they remain single. 4. Then we will drift back to the prehistoric age, when, acording to some theorists, woman was supreme

Of course it is all wrong for man to be superior, but all right for a woman to rule the man. There is another possibility. Perhaps science may discover a way for men to bear children. Why not, since so many male birds do most of the work now? If the theory of

evolution is correct and the physical animal can adapt itself to its environment, why not a reversal of sex? These suggestions seem to me to be the only practicable means to bring on the feminine millennium
